

October 6, 2020

**Summary of changes made to worksheets of Appendix J
Quality Assurance Project Plan of the Remedial Design Work Plan dated
March 2020 based on responses to EPA comments dated July 2, 2020**

- WS-1 – Revisions made based on comments
- WS-3 – Revisions made based on comments
- WS-4-1 – Revisions made based on comments
- WS-6 – Revisions made based on comments
- WS-7 – Revisions made based on comments
- WS-14– Revisions made based on comments
- WS-15 – Revisions made based on comments. Additionally, reporting limits for aqueous and soil/sediment parameters for GEL were added
- WS-19 – Revisions made based on comments. Also added bottle requirement, preservation, SOP and method information for GEL laboratories for aqueous samples and soil/sediment as well as waste classification. Note: spreadsheets were split out by laboratory.
- WS-20 – Revisions made based on comments
- WS -12 and WS-28 revisions made based on comments. Additionally, the following worksheets for GEL have been added:
 - Aqueous
 - VOCs
 - 1,4-Dioxane
 - SVOCs
 - Pesticides
 - Herbicides (TCLP only)
 - Metals (6010)
 - PFAS
 - Alkalinity, Total
 - Bromide, Chloride, Sulfate, Fluoride ortho-Phosphate, Nitrate-N, Nitrite-N

- Total Phosphorous
 - Nitrate/Nitrite Nitrogen
 - Ammonia Nitrogen
 - pH
 - Total Dissolved Solids
 - Total Suspended Solids
 - Perchlorate

 - Soil/Sediment/Waste classification:
 - VOCs
 - SVOCs
 - Pesticides
 - PCBs
 - Ignitability
 - Reactive Cyanide
 - Reactive Sulfide
 - pH / Corrosivity
-
- WS-23 – Revisions made based on comments. Also, SOP references added for GEL for aqueous, soil/sediment and waste classification

 - WS-24 & 25 – Revisions made based on comments

 - WS-30 – Revisions made based on comments changes to/addition of worksheets

 - WS-34-36 – Revisions made based on comments
